To search for a mental health care provider who accepts Mississippi Medicaid, use the following steps on the Internet:

1. Go to: <https://msmedicaid.acs-ionc.com/msenvision/providerSearch.do>
2. Enter any combination of the provider's type, specialty, last name, first name, city, state, zip code, or county. In order to select more than one type, specialty, or county, single click the first then select more by holding down the CTRL key and clicking more. Select a range by holding down the Shift key when above or below items are already selected.
3. Press the Submit button
4. If you make a mistake, please the RESET button and start again.

Local-Level MAP (Making a Plan) Teams

- Target Population: MAP Teams exist to serve the following children and youth (up to age 21) with serious emotional/behavioral disorders or serious mental illness and:
 - who are at-risk for an inappropriate **24 hour institutional placement** due to lack of access to or availability of needed services and supports in the home and community.
 - Children with SED who are returning to a primary caregiver in the community from an inpatient acute psychiatric hospital or psychiatric residential treatment facility are also included in the target population to be served by MAP Teams.
 - Children/youth who are SED/SMI who are of transition age (14-21) and need assistance with resource planning to remain in the community.
 - Younger children (ages 3-5 years) who have been identified as being most at-risk of later SED, as per the MAP Team At-Risk Screening Checklist, can also be assisted with identifying and accessing community resources by the local MAP Team.

Primary Tasks:

- The **first priority** of the MAP Teams is to review cases concerning children and youth (ages 5 to 21) who have a serious emotional/behavioral disorder or serious mental illness and who are at immediate risk for an inappropriate **24 hour institutional placement** due to lack of access to or availability of needed services and supports in the home and community. Immediate risk is defined as 1) the actual consideration of being placed out of the home at the time the referral is made or 2) community resources are not meeting the needs of the child/family at the time the referral is made.
- The **second priority** of the MAP Teams is to review cases of children (ages 3-5), who have early behavioral and peer relationship problems and two or more of the factors identified on the “MAP Team At-Risk Checklist”.
- The **third priority** of the MAP Teams is to review cases of transition-age children/youth (ages 14-21) to assist with resource planning to meet specific needs for appropriately remaining in the community.
- MAP Teams identify **community-based services** that may divert children and youth from an inappropriate 24 hour institutional placement.
- MAP Teams facilitate the **provision and coordination of services** across agencies/entities for the target population.
- MAP Teams facilitate **continuity of care** for children/youth with serious emotional disorders/ serious mental illness.
- MAP Teams facilitate **support** for children/youth with serious emotional disorders/ serious mental illness and their families.

Membership (typically includes representative from each of the following)

- Families
- Local schools
- Community Mental Health Center
- County Human Service Office, Family and Children’s Services
- Local Department of Rehabilitation Services
- Local Health Department Representatives
- Local Law Enforcement
- Youth leaders
- Ministers
- Other representatives of children/youth family service groups or organizations
